Maximum Marks	4 Marks

Empathy Map

The empathy map represents the perspective of a customer applying for a credit card. It helps understand the applicants need, concerns, actions, and emotions so that the machine learning system can provide faster and fairer approval decisions.

SAYS - I want a transparent approval process. - I need a credit card with quick approval. - I hope my application is accepted.	THINKS - I hope the decision is fair. - Will my credit score affect approval? - Are my income and documents sufficient?
PERSONA NAME Credit Card Applicant (Customer/User)	
DOES - Checks application status regularly. - Submits personal and financial details. - Uploads required documents.	FEELS - Relieved when approved. - Anxious while waiting. - Confident if credit history is good.
