

Project Initialization and Planning Phase

Date	05 July 2026
Team ID	SWTID-2026-3218
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement) :

Banks take a lot of time to manually review credit card applications, making the approval process slow and prone to errors. A machine learning-based system is needed to quickly and accurately predict whether a credit card application should be approved or rejected.

Problem Statement (PS)	I am (Customer)	I'm trying To	But	Because	Which makes me feel
PS-1	A bank credit analyst.	Predict whether a credit card applicant will be approved or rejected.	Manually reviewing thousands of applications is time-consuming and error prone.	Volume of applications is high and factors vary widely.	Confident when decisions are accurate, fast, and consistent.
